

IOPscience | extra™
2015

iopscience.org/extra

Innovation*

*for your institution

IOPscience extra[™], our premium electronic-only subscription package, offers your researchers more than 140 years of IOP Publishing content, including some of the most vital scientific, technical and medical research ever published, in one fully integrated resource.

More than 70 prestigious IOP Publishing and partner journals*, including our renowned Journal of Physics series

Covering subjects in the fields of: astronomy, astrophysics, biological physics, chemistry, engineering, environment, mathematics, physics and medical physics.

A focus on delivering research in the fields that your institution needs

IOPscience extra provides international breakthroughs, pioneering achievements and exciting new developments across subject areas that reflect the needs of the scientific research community.

These specially compiled subject groups include our rapidly growing materials science portfolio, *IOPmaterials*, and our expanding medical physics collection.

Our complete archive: every article since 1874

Comprising more than 300,000 articles, the archive is an indispensable resource enabling researchers to track the progress of important research and download papers no matter when they were published.

Physics World Archive

Every article published since the magazine's launch in 1988, including more than 11,000 news items, feature articles, comments and reviews. The *Physics World Archive* offers a real insight into the key breakthroughs in physics over the last 27 years. This service is usually only available via subscription.

**IOPscience extra* excludes AAS titles

“Thanks for the great opportunity to search in an additional stream of scientific works. It works for me like a charm.”

Milan Berta Laboratory of Terahertz Spectroscopy, Institute of Physics of the AS CR, v.v.i., Prague, Czech Republic

“Our library has had a very satisfactory experience. It is a unique platform with multiple features for information, search and retrieval, developed from a collection of highly rated titles.”

Inna Steklyar Head of Periodicals Department, Neiman Library of Exact Sciences and Engineering, Tel-Aviv University, Israel

Inspiration*

*for your institution

more than
540,000
articles in total

more than
140 years
covering some of the most vital
research ever published

230,000
IOP Journal Archive articles

Whatever your researcher's interests, *IOPscience extra* has the content they need

Groundbreaking research across 12 vital scientific, technical and medical areas

A range of key fields encompassing broad, multidisciplinary content, niche titles and critical advances in scientific discovery.

- IOPmaterials
- Instrumentation and measurement
- Condensed matter
- Biophysics, biomedical engineering and medical physics
- Applied physics
- Mathematical, computational and theoretical physics
- Plasma physics
- Astronomy, astrophysics and cosmology
- Atomic and molecular physics
- Nuclear and particle physics
- Optics and photonics
- Earth, environment and climate

New for 2015: 2D Materials (2DM) and Materials Research Express (MRX)

Two new multidisciplinary journals have been added to the *IOPscience extra* subscription package in 2015, enabling IOP Publishing to respond to author and reader demand across the growing materials research community.

- *2D Materials* covers all aspects of the exciting field of graphene and related two-dimensional materials. The multidisciplinary content of this journal provides a great overview of research in this area from wide-ranging communities, guaranteeing essential reading for any researcher in this field.
- *Materials Research Express* is a broad, multidisciplinary journal devoted to publishing new experimental and theoretical research on the design, fabrication, properties and applications of all classes of materials.

IOPscience extra content articles available to download

Number of citations received on IOPscience extra content

IOPscience extra is accessible through our online service **iopscience.org**

Our evolving website platform will benefit you and your researchers by offering a diverse range of functionality designed to enhance article discovery and make the most of the content you've provided.

- Easy-to-use yet extensive search options that significantly save time for your researchers by guiding them directly to the most relevant content.
- Filtered, reliable searching also encourages your users to search from their institutional library or database links, rather than via an external search engine.
- All content streams are fully integrated for maximum clarity and scope. Access to additional content streams alongside IOP content helps researchers find important articles across our subject coverage that may otherwise be missed.
- Researchers can set up customized alerts notifying them when new articles meeting their chosen search criteria have been published.
- Innovative technologies such as our pioneering Article Evolution™ functionality further enhance the article experience with features including MathJax, image tools such as zoom and Powerpoint export, mobile view, article level metrics, figure browser, expanded export options and quick links to references and citations.
- Other useful functionality designed to make article discovery effortless includes article tagging, social bookmarking and RSS feeds.
- Improved citation alerts, a feature specifically for subscribers, enables your users to be notified when a selected paper has received a new citation.
- Access via institutional IP addresses, Athens and Shibboleth means content is never far away with no frustrating denials to the full-text article. Your researchers can download what they want, when they want it.
- A range of support and promotional materials available for both you and your researchers along with links to valuable online services for librarians, authors and referees.

Clarity*

*for you

Provide your researchers with access to high-quality content quickly and easily

Try before you buy

A free trial of *IOPscience extra* over a limited period of time is available for your institution and offers a fantastic opportunity to discover the content and functionality that this package provides.

We have a range of support materials readily available to help you and your researchers, and we can provide technical and general assistance at any time before, during and after your trial period.

Contact us today

It's quick and easy to set up access to *IOPscience extra* via iopscience.org and prices for this fully integrated package are tailored for your institution to offer exceptional value.

Contact our customer services department at custserv@iop.org or speak to your **Regional Manager** today to find out more.

Let's keep moving science forward with *IOPscience extra*.
